

ABOUT TIMES-7

We are a high-tech company specializing in the design and manufacture of RAIN (UHF) RFID antennas. Founded in 2006, Times-7 has developed the largest portfolio of fixed RAIN RFID reader antennas. Based in Lower Hutt, New Zealand we export all over the world through an authorized network.

Times-7 antennas are famous for their quality and performance.

In addition to our world-class products and in-depth expertise, our customers appreciate Times-7's customer service and technical support.

We are responsive in supporting a large global customer base and ensuring the success of our customer's implementations.

150 mm / 5.9 in. square footprint

IP68 rating for permanent outdoor and industrial applications

Aesthetically appealing design

Mid-range, typically 1.5m read range

The SlimLine™ A5020 MR

The A5020 Mid Range antenna is a member of our A5020 family, a versatile range of high performing antennas for a variety of applications. Our A5020 antenna range includes some of our best-selling antennas because they are robust yet compact.

Equipped with the familiar and industry leading Times-7 ultra-low profile, the A5020 MR offers a compact footprint of only 150 mm / 5.9-inch square in a very smart-looking design. The A5020 MR is designed to operate in complex and busy environments where stray reads are a risk to productivity and accuracy. It is specifically tuned to read just beyond the near field zone ensuring things in the mid-range proximity of up to 1.5m are accurately tracked, while ignoring items further away.

The A5020 range is built to Times-7's high standard for quality and ruggedness. Being rated IP68 the A5020 MR can also be used for permanent outdoor applications.

As well as being durable, its pleasing and timeless design blends beautifully with most interiors and makes the A5020 MR very suitable for customer facing environments.

Ordering Information (please quote product code, band and part no.)

Antenna Product Code	Band	Part No.
A5020 MR	902-928 MHz / FCC	72388
A5020 MR	865-868 MHz / ETSI	72389

Physical / Environmental Specifications

Dimensions (L x W x D)	150.7 mm x 149.4 mm x 14.5 mm 5.93" x 5.88" x 0.57"
Boxed Unit Dimensions (L x W x D)	180 mm x 155 mm x 25 mm 7.09" x 6.10" x 0.98"
Weight	Net: 0.20kg / 0.44 lbs. Gross: 0.25kg / 0.55 lbs
Radome Material and Color	UV Resistant and Fire-Retardant WHITE ABS
Environmental Rating	IP68
Operating and Storage Temperature	-30° to +65°C / -22° to +149°F
Mounting	Flush or 100 x 100 mm VESA mount using the four mounting holes
Connector Type / Position	SMA female (Jack) side connector
A5020 Flush Screws	30mm 8g Phillips, white colored wood screws

Electrical Specifications

Frequency Range	865-868 MHz (ETSI) / 902-928 MHz (FCC)
Polarization	RHCP (Right Hand Circular Polarized)
Far-field Gain	-3 dBiC typical
Far-field 3dB beamwidth	115° in XZ and 105° in YZ plane
VSWR	1.8 typical
Front to back	-8 dB
Axial Ratio	2.5 dB typical
Nominal Impedance	50 Ω
Anti-static Protection	Yes, DC Grounded
Antenna Detection	10K Ω resistance
Maximum Input Power	3 W

Radiation Pattern

Antenna Planes

Applications

Kiosk / Self Check Out / POS

The A5020 MR antenna's lower gain RF radiation can be confined to a smaller zone, while operating at low power.

The antenna is best suited for kiosks and POS applications where a confined read zone is required. The antenna is aesthetically appealing and fits into every environment.

Sorting and Packaging Conveyor

The A5020 MR antenna has a medium range of up to 1.5 meters which means it is ideal for scanning intended goods that are moving on a conveyor belt.

It is rugged and can handle knocks should the assets jitter while in motion.

Cabinetry and Shelves

The A5020 MR has lower-gain compared to the A5020 CP antenna yet it has the potential to read across a cabinet shelf without extending its reads beyond the intended zone.

Mounting Information

The recessed corner mounting holes of the A5020 support 100 x 100mm VESA spaced mounting brackets as shown in the picture.

The innovative slim design of the A5020, equipped with an SMA connector, allows for totally flush mounting using the corner holes.

In situations where the antenna may be subject to stress on the connector or cable it is recommended to use our Connector Protection Backplates. These protect the connector from damage, especially when mounted on a bracket in free space. The Connector Protection Backplate can be used with right angled or straight cables.

Caution:

- Ensure that only finger tightness is used for the SMA connector.
- Use of tools to tighten the connector will apply excessive force and will damage the connector
- Avoid any load or bending force from the cable on the connector.

For further information please refer to the drawings below.

Order Information

Antenna Product Code	Band	Part No.
A5020 MR	902-928 MHz (FCC)	72388
A5020 MR	865-868 MHz (ETSI)	72389

When ordering cable accessories please quote the product code, cable type, & part no.

Antenna Product Code	Band / Model	Part No.
