WHY TAGMATIKS RETAIL

Inventory Excellence

Use RFID handhelds to cycle count inventory. Using RFID handhelds drastically reduces time that is required to count inventory and improves inventory accuracy.

Enterprise Solution

Packed with extensive enterprise features including being designed for the cloud, TagMatiks Retail makes it easy to manage inventory across a large quantity of retail stores.

Configurability

TagMatiks Retail includes a variety of configurations to make sure the solution is adoptable for every retailer.

Serialization Management

TagMatiks Retail manages your serialization to ensure that your RFID labels are encoded properly and that duplicates don't occur. We even have a complementary solution called TagMatiks Print Manager to make it easy for your suppliers to label your products for you with RFID labels.
